

Healthier together.

Protect yourself, your loved ones and the moments that matter the most.

Why get the flu shot?

This year, it is more important than ever to get the flu vaccine because of the COVID-19 pandemic.

During the 2019–2020 flu season, the flu vaccine prevented an estimated 7.52 million flu illnesses.

The flu vaccine has been shown to reduce the risk of getting the flu by up to 60 percent.

Anyone can get the flu, even if you're healthy year-round.

The flu vaccine is made with inactive flu virus, so it can't cause the flu. But it can lower your risk of getting sick while also helping protect everyone around you. Plus, it's available at no cost to you. And getting your flu shot may earn you rewards.

Stay healthy, happy and confident.
