

March 20, 2019

Dear Provider,

On 02/05/19, HFS released a [Provider Notice](#) regarding CMHC and BHC claim submission for multiple units of the same service, rendered to a member at different locations, on the same day.

When billing multiple units of the same procedure code/modifier combination rendered to one member on the same date of service, at different locations, please use the following table to determine the appropriate place of service code to use for claims submission:

	Two or more different 'On-Site' POS on the same day	Two or more different 'Off-site' POS on the same day
CMHCs	53	99
BHCs	11	99

When submitting a claim for a single service rendered (not “rolled up” services), providers must use the true place of service code consistent with the policies detailed in the [Community Based Behavioral Services \(CBS\) Provider Handbook](#).

Please note, while using the above interim guidance provided by HFS, the provider is still responsible for documenting the true place of service in the member’s clinical record.

If you have any questions, please contact your Provider Relations representative at 866-329-4701.

Sincerely,

IlliniCare Health
