Availity Reporting Capabilities

Dear Provider:

As you familiarize yourself with [Availity](#) (*Aetna Better Health® of Illinois Provider Portal*), we want to ensure that you are aware of the existing, and developing, reporting capabilities Availity has to offer.

Providers can now take advantage of the new COVID Booster Eligibility Report, in addition to the existing tools/reports already accessible:

- Prioritized Member List

- Inpatient Authorizations

- Inpatient Census

- P4Q Gap Report

- Claims Remits

- Combo 3 Vaccinations

- COVID Vaccine Member List

- Cost/Utilization Dashboard

- Echo Back Report

- Denied Claims

- Negative Balance

- Enhanced Group-Level Member Roster

We are also excited to announce that additional reporting capabilities will be rolled out during the Summer of 2022. These enhancements, currently in development, will give Providers access to reporting functionalities impacting Pharmacy Adherence, Claims Recoupments, and Provider Performance Metrics.

If your organization is not yet registered with Availity, please register for access using the [Availity Provider Portal Registration](#) option via [Availity.com](#).

Thank you,

Aetna Better Health® of Illinois
