Introduction to the OhioRISE Mixed Services Protocol

The OhioRISE Mixed Services Protocol clarifies financial responsibility for behavioral health services provided to children and youth who:

- Are enrolled in the OhioRISE plan.
- Become enrolled in the OhioRISE plan as of the date of admission to an inpatient behavioral health stay on or after OhioRISE program implementation (July 1, 2022).

This protocol includes services that are covered by both the OhioRISE plan and the Managed Care Organization (MCO). It excludes the enhanced or new services that are only covered by the OhioRISE plan. Services that are not behavioral health (dental, transportation, etc.) are not OhioRISE covered services and remain the responsibility of the individual's MCO (or fee-for-service (FFS) Medicaid). Financial responsibility for behavioral health services provided to children and youth who are not enrolled in the OhioRISE plan remain the responsibility of the recipient's managed care organization or fee-for-service Medicaid.

Providers can use this document to identify the entity to which claims should be submitted if a child or youth is enrolled in the OhioRISE plan. Services are defined in the column on the left, while the entity to which the claim should be routed, dependent on the date of service, is in the column on the right.

Please note that inpatient behavioral health admissions for children and youth under age 21 on the admission date result in OhioRISE enrollment effective the date of admission, regardless of whether or not the eligibility systems demonstrate OhioRISE enrollment at the time the child or youth is admitted. Therefore, inpatient behavioral health hospital admissions, as described in this document, are the responsibility of the OhioRISE plan.
