### Intent:

The intent of this policy/guideline is to provide information to the prescribing practitioner outlining the coverage criteria for Nuvigil (armodafinil) under the patient's prescription drug benefit.

### Description:

Nuvigil (armodafinil) is indicated to improve wakefulness in adult patients with excessive sleepiness associated with obstructive sleep apnea (OSA), narcolepsy, or shift work disorder (SWD).

### Limitations of Use

In OSA, Nuvigil (armodafinil) is indicated to treat excessive sleepiness and not as treatment for the underlying obstruction. If continuous positive airway pressure (CPAP) is the treatment of choice for a patient, a maximal effort to treat with CPAP for an adequate period of time should be made prior to initiating Nuvigil (armodafinil) for excessive sleepiness.

### Applicable Drug List:
