

AETNA BETTER HEALTH®  
Coverage Policy/Guideline

Name: Compounded Drug Products Page: 1 of 3

Effective Date: 12/5/2025 Last Review Date: 11/18/2025

Applies to:  Illinois  Florida  New Jersey  
 Florida Kids  Pennsylvania Kids  Kentucky PRMD

### Intent:

The intent of this policy/guideline is to provide information to the prescribing practitioner outlining the coverage criteria for compounded drug products under the patient's prescription drug benefit.

### Description:

N/A

### Applicable Drug List:

N/A

### Policy/Guideline:

**Compounded drug products will be covered with prior authorization when the following criteria are met:**

- The request is for any of the following: A) intravenous (IV) injection or infusion, B) anti-infective for injectable use (e.g., antibacterials, antivirals, antifungals), C) total parenteral nutrition (TPN), D) pyrimethamine, E) sirolimus for tuberous sclerosis where other dermatological treatments (e.g., laser therapy, surgery, dermabrasion) are inappropriate

**OR**

- The request is for tacrolimus (Prograf) or everolimus (Zortress) for a patient receiving a transplant

**OR**

- Each of the active ingredients in the compound are FDA-approved drugs

**AND**

- Each of the active ingredients in the compound are FDA-approved for the indication for which the compound is being prescribed

**AND**

- The compound route of administration (ROA) is the same as the FDA-approved route of administration for each active ingredient

**AND**

- The dosage or concentration of each active ingredient in the compound is equal to or below the FDA-approved dosage or concentration

**AND**

- The compound is not intended for anti-aging or cosmetic use, or is not a compound kit, or does not contain a bulk powder or dietary supplement

**AND**

- The request is not for a hormone therapy compound for menopause or for androgen decline due to aging, (e.g., testosterone, estrogen, progestin, bioidentical hormone)

**AND**
