

Childhood Immunization Status (CIS)

HEDIS® Measurement Year 2024

Measure description: Measure description: Children 2 years of age who completed all of the required vaccines listed below by their 2nd birthday:

4 DTaP	3 HiB	3 HepB	1 VZV	2 Flu
4 PCV	3 IPV	1 MMR	1 HepA	2 - 3 RV

Documentation required

For immunization evidence obtained from the medical record, count members where there is evidence that the antigen was rendered from one of the following:

- A note indicating the name of the specific antigen and the date of the immunization.
- A certificate of immunization prepared by an authorized health care provider or agency including the specific dates and types of immunizations administered.
- For documented history of illness or a seropositive test result, there must be a note indicating the date of the event, which must have occurred by the member's second birthday.

Strategies for improvement

- Utilize NCQA coding tips to actively reflect care rendered.
- Educate staff to schedule visits within the guideline time frames.
- Administer vaccinations during already scheduled appointments.
- At each appointment, review immunization records and encourage the opportunity to catch up on missing immunizations.
- Educate parents on vaccinations, their side effects, and perceived links to autism.
- Advise parents on the importance of completing each vaccine series.
- Provide handouts on the diseases that the vaccines prevent.
