

HEDIS® News You Can Use

Let's Improve Childhood and Adolescent Immunizations Together

Childhood Immunization Status (CIS)

Measure Requirements:

Children who turn 2 years of age in the measurement year and receive the following immunizations **by their 2nd birthday**:

- 4 DTaP, 4 PCV
- 3 IPV, 3 HIB, 3 Hep B
- 1 MMR, 1 VZV, 1 Hep A*
- 2 or 3 Rotavirus (Rotarix vs Rotateq)
- 2 Influenza

*** MMR, VZV and Hep A must be given on or between the first & second birthday**

Coding Information:

- DTaP: 90698, 90700, 90721, 90723
- PCV: 90670, G0009
- IPV: 90698, 90713, 90723
- HIB: 90644-90648, 90698, 90721, 90748
- Hep B: 90723, 90740, 90744, 90747, 90748, G0010
- MMR: 90707, 90710
- VZV: 90710, 90716
- Hep A: 90633
- Rotavirus: 90681 (2 dose), 90680 (3 dose)
- Flu: 90655, 90657, 90660, 90672, 90661, 90662, 90673, 90685-90689, G0008

Immunizations for Adolescents (IMA)

Measure Requirements:

Adolescents that turn 13 years of age in the measurement year and receive the following immunizations **by their 13th birthday**:

- 1 Meningococcal *between 11th and 13th birthday*
 - ⇒ **Meningococcal Recombinant vaccines are not compliant (Serogroup B, MenB)**
- 1 Tetanus, diphtheria toxoids and acellular pertussis (Tdap) *on or between 10th and 13th birthday*
 - ⇒ **Td is not compliant for HEDIS**
- 2 (two-dose) or 3 (3-dose) HPV vaccines *on or between the 9th and 13th birthday*
 - ⇒ **Required for females AND males**
 - ⇒ **2-dose HPV vaccine series must be at least 146 days apart**

Coding Information:

- Tdap: 90715
- Meningococcal :90734
- HPV: 90649, 90650, 90651

Aetna Better Health® of West Virginia

CIS and IMA Gaps in Care

Common reasons members still appear to have CIS and IMA 'Gaps in care' despite vaccinations given:

- Birth Hep B missing in claims and medical record
- An administered 2-dose Rotavirus not documented as a 2-dose (i.e. Glaxosmith Kline, Rotarix, Monovalent)
- CIS vaccines administered after the 2nd birthday
- Tdap, MCV and/or final dose of HPV given after age 13
- MCV given before age 11
- Vaccines given at other offices or health departments not billed or documented in the medical record.

Use the WV Immunization Registry

- Remember to record all vaccines in WVSIS
- Be sure name spelling, date of birth and vaccine entries are accurate and match the medical record
- Ensures a contiguous member vaccine record
- <https://www.wvimm.org/wvsis/>

Health importance of vaccinations

Parents consider you their most trusted source of information when it comes to vaccines. When talking to parents, make a strong, effective recommendation and allow time for questions. Hearing your answers can help parents feel more confident vaccinating their child to the CDC's recommended immunization schedule.

Great CDC Resources

Here for you

Thank you for the care you provide to our members!

For questions or for more information, please contact Shelly Rouse, ABHWV Quality HEDIS Manager **at** ABHWVHEDIS@aetna.com or **304-348-2923**.

Best Practices

Tips to improve CIS and IMA HEDIS® performance:

- Proper coding ensures compliance and decreases chart review
- ABHWV will pay for a well child visit outside of the 12-month cycle
- HEDIS requires more than school **CIS**—Rotavirus, Flu; **IMA**—HPV
- Schedule 2 year well child visits *on or before* the 2nd birthday.
- Schedule 13 year old well child visits *on or before the 13th birthday*
- Document the date of the first Hep B given at the hospital
- Differentiate between 2 or 3-dose Rotavirus (i.e. GlaxoSmithKline/Merck, Rotarix/RotaTeq, Monovalent/Pentavalent,)
- Discuss HPV vaccination in terms of cancer prevention, The HPV vaccine is most effective *before* sexual activity begins.
- Recommend the HPV vaccine the same way and on the same day you recommend other vaccines.
- Obtain immunization records from other offices and HDs.
- Minimize missed opportunities—use each visit to review vaccines and catch-up missing vaccines
- Contact members on your Gap in Care report to schedule vaccines.
