# Let's Improve Childhood and Adolescent Immunizations Together!

## **Childhood Immunization Status (CIS)**

# **1** Measure Requirements:

Children who turn 2 years of age in the measurement year and receive the following immunizations **by their** 

### 2nd birthday:

- 4 DTaP, 4 PCV
- 3 IPV, 3 HIB, 3 Hep B
- 1 MMR, 1 VZV, 1 Hep A\*
- 2 or 3 Rotavirus (Rotateq vs Rotarix)
- 2 Influenza
  - ⇒ MMR, VZV, and Hep A must be given on or between the first & second birthday
  - ⇒ Rotavirus documentation should differentiate between a 2-dose or 3-dose vaccine (i.e., GlaxoSmith/Merck, Rotarix/ Rotaeq, 2-dose or 3-dose)

### **Lead Screening in Children (LSC)**

# **1** Measure Requirements:

Children who turn 2 years of age in the measurement year and receive one or more capillary or venous lead blood tests **by their 2nd birthday**.

# Coding Information:

**DTaP Vaccine:** 90697, 90698, 90700, 90723 **IPV Vaccine:** 90697, 90698, 90713, 90723

MMR Vaccine: 90707. 90710

Hib Vaccine: 90644, 90647, 90648, 90697, 90698,

90748

**Hep B Vaccine:** 90697, 90723, 90740, 90744, 90747,

90748

**VZV Vaccine:** 90710, 90716

PCV Vaccine: 90670

**RV Vaccine:** 90681 (2 dose), 90680 (3 dose)

Flu Vaccine: 90655, 90657, 90660, 90661, 90672,

90673.90685-90689

Lead Testing: 83655 LOINCS available by contacting

Quality Management.

# Immunizations for Adolescents (IMA)

## **Measure Requirements:**

Adolescents that turn 13 years of age in the measurement year and receive the following immunizations by their 13th birthday:

- 1 Meningococcal between 11th and 13th birthday.
  - ⇒ Meningococcal recombinant (serogroup B, Men B is not compliant for HEDIS).
- 1 Tetanus, diphtheria toxoids and acellular pertussis (Tdap) on or between the 10th and 13th birthday.
  - $\Rightarrow$  Td is not compliant for HEDIS
- At least 2 HPV vaccines on or between the 9th and 13th birthday.
  - ⇒ There must be at least 146 days between the first and second dose.
  - ⇒ Required for females AND males

# Coding Information:

Meningococcal: 90619, 90733, 90734

**Tdap:** 90715

HPV: 90649-90651

### **Common Reasons for Gaps in Care:**

- Birth Hep B missing in claims and medical record.
- An administered 2-dose Rotavirus not documented as a 2dose (i.e. Glaxosmith Kline, Rotarix, Monovalent).
- Influenza and Rotavirus series missing or not fully completed.
- Rotavirus series has more narrow CDC recommendation window for series completion.
- 4th DTap and 4th Pneumococcal vaccines not completed.
- Lead testing and CIS vaccines administered after the 2nd birthday.
- Lead testing completed, but no result.
- Tdap, MCV and/or final dose of HPV given after age 13.
- Incomplete HPV series.
- MCV given before age 11.
- Adolescents don't often seek care unless injured/sick.
- HEDIS requires more than what is required by school (i.e., Flu, Rotavirus, HPV).
- Immunizations given at other offices or health departments not billed or documented medical record.

## Patients trust you:

Patients consider you their most trusted source of information when it comes to their health. When talking to patients, encourage and allow time for questions.

## Here for you!

Thank you for the care you provide to our members! For questions or for more information, please contact **Sherry** Griffith at ABHWVHEDIS@aetna.com.

- Record all immunizations in the state registry.
- Code accurately—Proper coding ensures compliance.
- Use each visit to review vaccines and catchup missing vaccines.
- Schedule 2 year well-child visits on or before the 2nd birthday
- Document the date of the first Hep B given at the hospital.
- Differentiate between a 2-dose or 3-dose Rotavirus vaccine (i.e. GlaxoSmithKline/ Merck, Rotarix/RotaTeq, Monovalent/ Pentavalent, 2-dose/3-dose).
- Avoid missed opportunities—recommend the HPV vaccine the same way and on the same day that you recommend other adolescent vaccines.
- Discuss HPV vaccinations in terms of cancer prevention. The HPV vaccine is most effective before sexual activity begins.
- Obtain immunization records from other offices and HDs.
- Provide CDC information.
- Contact members on your Gap in Care report to schedule appointments for needed vaccines.
- Document all refusals (NOTE: this does not count towards compliance, but it does prevent additional outreach to the office attempting to capture the immunizations).
- Obtain results of blood lead tests that are performed at an onsite lab, health department, and/or WIC office and place in medical record.
- Options exist for in-office testing including blood lead analyzer testing.
- Send all sources of vaccine documentation during HEDIS medical record review.
- Promote ABHWV IMA \$25 member incentive for completing Tdap, Meningococcal, and HPV series by the 13th birthday.
