ACCESSIBLE EXAM ROOM

An accessible examination room has features that make it possible for patients with mobility disabilities, including those who use wheelchairs, to receive appropriate medical care. These features allow the patient to enter the examination room, move around in the room, and utilize the accessible equipment provided. The features that make this possible are:

1. an accessible route to and through the room;
2. an entry door with adequate clear width, maneuvering clearance, and accessible hardware;
3. appropriate models and placement of accessible examination equipment (including an adjustable height accessible exam table that lowers for transfers) and
4. adequate clear floor space inside the room for side transfers and use of lift equipment.
