

Aetna Better Health®

Specialty Drug Program

Aetna Better Health Specialty Drug Program is managed through CVS Health Specialty Pharmacy. The Specialty pharmacies fill prescriptions and ship drugs for complex medical conditions, including multiple sclerosis, rheumatoid arthritis and most cancer drugs. Medications provided through CVS specialty pharmacy include injectable, oral and inhaled drugs. Due to the complexity of these drugs, they require a high level of support and care guidelines for shipment and storage.

The Specialty Drug Program provides care management services to your members, including:

- 24 hours a day, seven days a week access to a pharmacist
- Disease-specific education and counseling by the CareTeam™. The CareTeam™ are clinical professionals who review dosing and medication schedules, identify injection issues, provide education of potential side effects and provide information to help your member to manage their medical condition.
- Care coordination with your member and you
- Delivery of Specialty drugs to your member's home and/or your office in temperature-controlled packaging with the required supplies, i.e. needles, syringes, and alcohol wipes

Contact CVS Specialty Pharmacy at 1-800-237-2767 from 7:30 a.m. (EST) to 9:00 p.m. (EST) time, Monday – Friday. CVS Specialty Pharmacy will assist you in filling your specialty drug. Prior Authorization (PA) still applies to specific specialty drugs that require a clinical review. You can check our health plan website at <https://www.aetnabetterhealth.com/illinos/members/pharmacy/> to confirm PA requirements on the below listed medications as well as review of the PA Guideline used in our clinical reviews.
