Prior Authorization Guidelines for All Indications:
Botox, Myobloc, Dysport, Xeomin must be prescribed by an appropriate specialist based on indication and meet the following criteria:

- **Migraine Prophylaxis (Botox):**
  - Prevention of chronic migraine (at least 15 days per month with headaches lasting 4 hours a day or longer)
  - Member had inadequate response to or intolerable side effects with at least three medications from two classes of migraine headache prophylaxis medication for at least two months (60 days):
    - Beta-blocker: propranolol, metoprolol, timolol, atenolol, nadolol
    - Anticonvulsant: valproic acid or divalproex, topiramate
    - Antidepressants: amitriptyline, venlafaxine
    - Angiotensin-converting enzyme inhibitors (ACE-Is)/angiotensin II receptor blockers (ARBs): lisinopril, candesartan, losartan, valsartan
    - Calcium channel blockers: diltiazem, nifedipine, nimodipine, verapamil
  - Age restriction: must be at least 18 years old

- **Chronic Limb Spasticity (Botox, Xeomin, Dysport):**
  - Spasticity may be due to an injury to the brain or spinal cord, or along with a neurological disorder (for example, stroke, traumatic brain injury (TBI), multiple sclerosis (MS), spinal cord injury (SCI), cerebral palsy (CP))
  - Failure of baclofen and at least one other formulary muscle relaxant such as dantrolene. Trial of physical and/or occupational therapy
  - Age restriction (Botox): Upper limb and lower limb spasticity: must be at least 18 years old
  - Age restriction (Dysport): Upper limb spasticity: must be at least 18 years old
  - Age restriction (Dysport): Lower limb spasticity: must be at least 2 years old

- **Severe primary axillary hyperhidrosis excessive underarm sweating (Botox):**

Pharmacy Prior Authorization
Botulinum Toxins – Clinical Guideline

- Interferes with daily activities
- Failure of topical aluminum chloride 20%
- Age restriction: must be at least 18 years old

**Neurogenic bladder (Botox):**
- Diagnosis of urinary incontinence due to detrusor overactivity associated with neurologic condition
- Trial of behavioral therapy (for example, bladder training, bladder control strategies, pelvic floor muscle training, fluid management) for at least 8-12 weeks
- Trial and failure of two formulary urinary anticholinergics (for example, oxybutynin, trospium, tolterodine)
- Age restriction: must be at least 18 years old

**Overactive bladder (Botox):**
- Trial of behavioral therapy (bladder training, bladder control strategies, pelvic floor muscle training, fluid management) for at least 8-12 weeks
- Trial and failure of two formulary urinary anticholinergics (for example, oxybutynin, trospium, tolterodine)
- Age restriction: must be at least 18 years old

**Esophageal Achalasia (Botox):**
- Member meets ONE of the following:
  - Member remains symptomatic despite surgical myotomy or pneumatic dilation
  - Member is at high surgical risk or unwilling to undergo surgical myotomy or pneumatic dilation
  - Member presents with atypical achalasia symptoms and Botox is needed to help guide therapy and/or confirm diagnosis
- Age restriction: must be at least 18 years old

**Chronic anal fissures (Botox):**
- Trial and failure of nitroglycerin ointment 0.4% (Rectiv) AND either bulk fiber supplements, stool softeners, or sitz baths for at least one month
- Age restriction: must be at least 18 years old

Botulinum Toxins – Clinical Guideline

• Chronic sialorrhea (excessive drooling) (*Botox, Myobloc, or Xeomin*):
  o Trial and failure of anticholinergic such as glycopyrrolate (pediatric use 3-16) or benztropine (adults)
  o Age restriction (*Botox*): must be at least 21 months old
  o Age restriction (*Xeomin, Myobloc*): must be at least 18 years old

• Focal spasticity or equinus gait due to Cerebral Palsy (*Botox or Dysport*):
  o Member will be enrolled in or is currently being managed with occupational therapy
  o Age restriction: 2-18 years of age

Botulinum toxins may also be approved if medically necessary for treatment of the following indications which have limited treatment options:
  o *Botox* for cervical dystonia (also called spasmodic torticollis) in member at least 16 years old
  o *Dysport, Myobloc, Xeomin* for cervical dystonia: member is at least 18 years old
  o *Botox* for blepharospasm associated with dystonia, including benign essential blepharospasm or VII nerve disorders: member is at least 12 years old
  o *Xeomin* for blepharospasm: member is at least 18 years old and previously treated with onabotulinumtoxinA (*Botox*)
  o *Botox* for strabismus in member is at least 12 years old
  o *Botox* for hemifacial spasm: member is at least 18 years old

**Initial Approval:**
• 6 months
• Treatment should be given every 12 weeks

**Renewal:**
• 1 year
• Treatment should be given once every 12 weeks
• *Botox*: Should not exceed a cumulative dose of 400 units every 90 days

Last Update: 11/2018
Effective: 2/2019
Additional Information:

**Note:** If members do not respond to a course of treatment (usually lasts for 12 weeks), treatment should be discontinued.

**Note:** Continuing treatment with botulinum toxin injection for ongoing prevention of chronic migraine headaches is considered medically necessary when:

- Migraine headache frequency was reduced by at least 7 days per month (when compared to pre-treatment average) by the end of the initial trial; OR
- Migraine headache duration was reduced by at least 100 total hours per month (when compared to the pre-treatment average) by the end of the initial trial
