

AETNA BETTER HEALTH® OF TEXAS 2016 HEDIS® Results

HEDIS® is a tool we use to review the quality of our care and services. The following table shows our Aetna Better Health of Texas HEDIS® results from 2015 to 2016. It also shows the overall 2015 statewide average HEDIS® results for Medicaid. With your help, Aetna Better Health of Texas has experienced an improvement in THSteps and well-child checkups.

We are launching new initiatives focused on outreaching members using electronic means such as interactive voice response systems to address some of the measures we fell short in this last year. In addition, we launched the new provider Gaps in Care report to help providers identify members in need of care. The report can be found on the Provider Portal. We would also like to hear from you. If you have any ideas on how to engage members and get them in for services, please let your Provider Relations Representative know.

We would like to thank you for the care you provided to our members in 2015 and your participation in the data collection for 2016.

STAR
